

A creative learning journey in 4 acts bringing light, possibilities & energy in your own circus

**Oct 27, Nov 3, Nov12, Nov 26**

## Overview

**Magic** is defined as “the use of special powers to make things happen that would usually be impossible”. Like magicians do, this program puts ingredients that usually do not fit together into the same pot, to come up with unexpected results. Bringing art and business together, it combines fun and serious, rational and emotional components to help you highlight your own “special powers”, see what is invisible and expand your own problem solving approach and abilities.

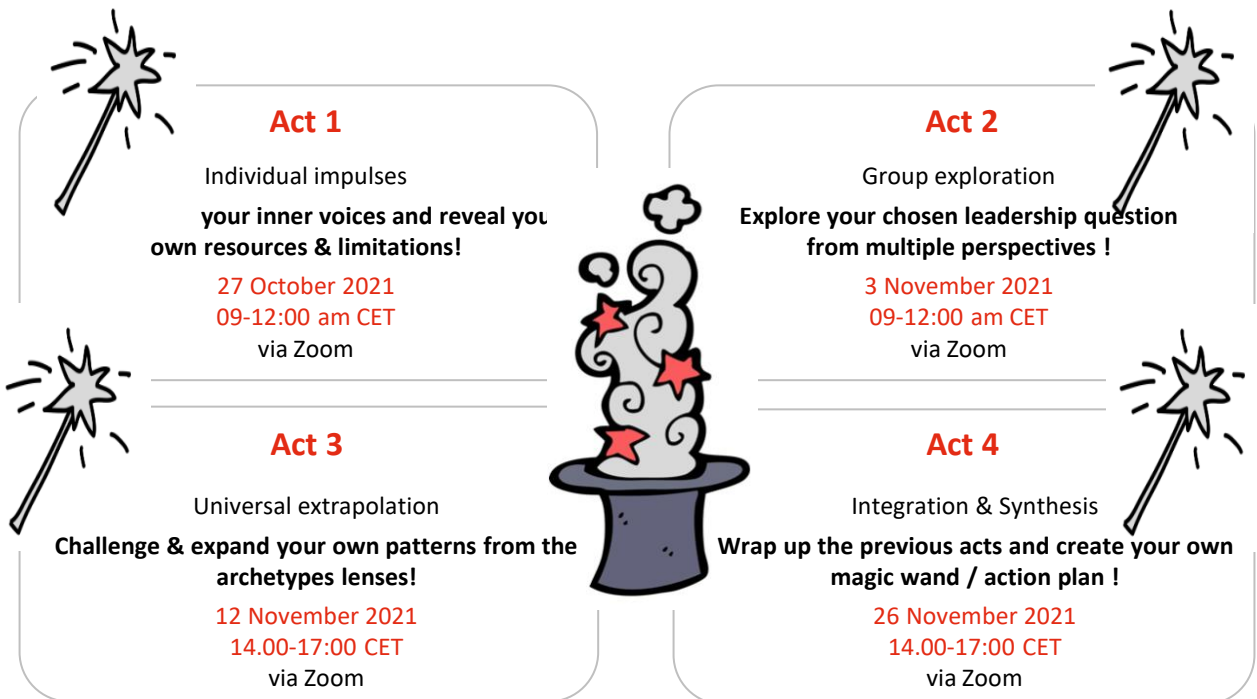

## Objectives

At the end of **Magic**, participants will have developed self awareness, expanded their own patterns and collectively created new paths to untangle their respective challenges in their own world.

## Approach

At the beginning of **Magic**, each participant will bring one real challenge that matters in their respective worlds. We will work with a “moonshot” mindset, amplifying individual and collective thinking, stimulating intuition and curiosity to achieve breakthrough solutions. Each act will add different concepts in our individual magic pot, including: instincts of play, improvisation & co-development, Jungian archetypes and theatrical expressions.

Throughout the 4 acts, participants will experience **Discovery, Revelation, Expansion and Crystallisation**.

## Participants

**Magic** is open to anyone who seeks to expand their abilities, discover the full range of their creative resources and resolve recurrent problems wherever they sit on the planet. No previous magical or theatric experience required. Language: English.
